Forecast for Friday 25 Dec 2020

Weather: High cloud thickens through the early hours. Then a dry, overcast morning, although some brighter spells likely. Cloud thickens and lowers around midday, bringing a few spots of rain and summit snow in the afternoon with severe gale to storm force winds across the tops. A couple of hours of heavier more persistent rain to all levels from early evening, clearing to leave clear spells and a few wintery showers by late evening.

Chance of cloud free mountain/hill tops above 800m: 60% around dawn, with cloud lowering into the tops of western ranges, but more broken across the Cairngorms and Monadhliath hills. Chances deteriorating through the morning as cloud becomes increasingly extensive above 600-700m, falling to nil by dusk. Cloud breaks forming by late evening.

Visibility: Increasingly poor on the tops as cloud lowers through the morning, whiteout conditions giving very poor contrast above the snow level. Very good at low levels.

Met Office Aberdeen Meteorologist's View

Increasingly difficult conditions this afternoon with a high chance of being blown over. Bitterly cold despite rising freezing levels. Gusts across the higher summits of the Cairngorms likely to reach 75 mph at times around dusk and early evening.

Forecast for Saturday 26 Dec 2020

Weather: Rain, snow above 700-800m, occasionally 900m in the west, persistent and often heavy from around dawn, although patchy across the eastern Cairngorms until the afternoon. Storm force winds on the summits throughout the day, giving persistent blizzard conditions on the tops. Snow lowering to 500-600m around late evening.

Maximum wind: Southwest 45 gusting 60-70 mph, becoming West-southwest 25 gusting 35-40 mph late evening.

Chance of cloud free mountain/hill tops above 800m: Nil, cloud persistent above 500m.

Visibility: Very poor throughout at height, near zero in persistent blizzards. A few km at low levels in heavy rain.

Temperature: **Glens:** Plus 4 Celsius
At 800m: Zero Celsius, falling to minus 2 Celsius late evening.
Freezing level: 800-900m, falling to 500m late evening.
